VANGALA VENKATA GEETHIKA

vangalageethika@gmail.com — +91-8919702183 — LinkedIn — GitHub — LeetCode

Professional Summary

Computer Science (Artificial Intelligence) undergraduate with a CGPA of 9.48/10 and strong foundations in Data Structures & Algorithms, Python, Java, JavaScript, SQL, and software development. Experienced in building full-stack applications, REST APIs, database-driven systems, and AI/ML solutions using React, FastAPI, PostgreSQL, and PyTorch.

Education

Bachelor of Technology (B.Tech) 2024 – 2028
Computer Science Engineering (Artificial Intelligence)
Amrita Vishwa Vidyapeetham, Amaravati CGPA: **9.48/10**

Intermediate / Higher Secondary Education 2022 – 2024
Sri Chaitanya Junior College Percentage: **98%**

Technical Skills

Programming Languages: Java, Python, C, JavaScript
Core CS: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving
Backend & APIs: FastAPI, REST APIs, Node.js
Frontend: React.js, HTML, CSS, JavaScript
Databases: MySQL, PostgreSQL, Neo4j
AI & Machine Learning: XGBoost, Regression, Classification, Feature Engineering, Model Evaluation
LLM & Retrieval Concepts: LLMs, Embeddings, Vector Databases, RAG
Tools: Git, GitHub, VS Code, Jupyter Notebook

Projects

Travel Planner Application GitHub
Java, MySQL, HTML, CSS, JavaScript

Built a travel planning application for managing itineraries, destinations, and personalized trip schedules.
Designed a relational MySQL database for user accounts, destinations, itineraries, and travel dates.
Implemented interactive frontend functionality using JavaScript with a responsive interface for trip planning.

TRAFIK-4X: AI-Powered Intelligent Traffic Management System GitHub
React.js, FastAPI, Python, XGBoost, PostgreSQL, Tailwind CSS

Built a full-stack AI platform with React frontend, FastAPI REST backend, and PostgreSQL for event-impact prediction and intelligent traffic planning.
Developed an XGBoost prediction pipeline and Event DNA similarity engine for event-risk analysis, resource allocation, and decision support.
Engineered modular REST APIs for prediction, similarity search, resource management, notifications, and role-based access control.

Publications & Presentations

Presented the research paper *"A Semi-Symmetric Skip Framework for Multi-Class Pediatric Brain Tumor Segmentation"* at the **10th International Joint Conference on Advances in Computational Intelligence (IJCACI 2026)**, organized by Washington University of Science and Technology (WUST), Alexandria, USA.

Certifications

AWS Certified Cloud Practitioner – Amazon Web Services (AWS) Sep 2026
Data Structures and Algorithms using Java – NPTEL (Elite Certification, IIT Kharagpur) Oct 2025
Machine Learning with Python – IBM (Coursera) Apr 2026
Python Essentials 2 – Cisco Networking Academy Feb 2026
Python Essentials 1 – Cisco Networking Academy Jan 2026

Achievements & Activities

Solved algorithmic and data structure problems regularly on competitive coding platforms including LeetCode.
Qualified for the next round of Flipkart Gridlock 2.0 Software Development Challenge, securing a position among the top 10% (1,635 out of 16,000+ participating teams).
